Professional Summary

Aspiring Electronics and Communication Engineer with a strong interest in Embedded Systems, IoT, and Microcontrollers. Seeking an opportunity to contribute to real-world projects while enhancing my technical and professional skills.

Education

Rajeev Gandhi Memorial College of Engineering and Technology

Bachelor of Technology in Electronics and Communication Engineering

Sep 2023 – May 2027

CGPA: 7.5/10

Technical Skills

Programming Languages: C, Python

Machine Learning: Data Preprocessing, Feature Engineering, Model Training

Libraries: NumPy, Pandas, Matplotlib

Tools: LTspice, MATLAB, Arduino IDE, Tinkercad, KiCad, Git, GitHub, Jupiter Notebook, MS Office

Core Subjects: Microprocessors and Microcontrollers, Digital Electronics, Analog Electronics, Basic VLSI, Networking theory, Electronics devices and circuits

Soft Skills: Analytical Thinking, Problem Solving, Teamwork, Communication

Projects

Voice-Activated Switching Circuit

- Tech Stack: LTspice | KiCad | Analog Electronics
- Designed a voice-activated switching circuit for home automation.
- Simulated the circuit using LTspice.
- Designed the PCB using KiCad.
- Developed a low-cost and efficient sound-controlled switching system.

Bed Wetness Detection and Alert System

- Tech Stack: Arduino Uno | Moisture Sensor | GSM Module | Embedded C
- Developed an Arduino-based bed wetness detection system.
- Integrated a moisture sensor to detect wetness in real time.
- Triggered LED, buzzer, and GSM alerts for caregivers.
- Designed a low-cost healthcare monitoring solution.

- **Certifications**

- Soft Skills – NPTEL
- Embedded Systems Workshop

Achievements

- Successfully designed and implemented an Arduino-based Bed Wetness Detection and Alert System.
- Designed and simulated a Voice-Activated Switching Circuit using LTspice and KiCad.
