Education

Rajeev Gandhi Memorial College of Engineering

2023 – 2027

B.Tech in Computer Science and Engineering (Data Science) | CGPA: 8.03/10

Andhra Pradesh, India

- Relevant Coursework: Data Structures & Algorithms, Linear Algebra, Probability & Statistics, Machine Learning, DBMS, Operating Systems

Achievements

1st Place – AI & Machine Learning Workshop Assessment, IIT Hyderabad

2026

- Secured **1st place among 200 participants** in the final assessment conducted during an AI & ML workshop at IIT Hyderabad.
- Assessment covered topics including supervised learning, convolutional neural networks (CNNs), optimization techniques, and batch vs mini-batch learning.
- Demonstrated strong conceptual understanding of machine learning fundamentals and emerging AI techniques.

Projects

Universal AI Chatbot using LLM APIs

- Built a multi-provider AI chatbot integrating OpenAI, Gemini, and Groq APIs for conversational responses.
- Designed structured prompts to improve response accuracy and reduce hallucinations.
- Implemented prompt templates for summarization, question answering, and explanation generation.
- Developed a simple user interface using HTML, CSS, and JavaScript with dynamic API integration.

AI Video Generation using Prompt Engineering

- Designed prompts to generate short narrative AI videos using generative video tools.
- Optimized prompts for scene generation, narration, and visual storytelling consistency.
- Applied prompt engineering techniques such as role prompting and step-by-step instructions.
- Experimented with prompt variations to improve output quality and coherence.

Cancer Treatment Recommendation using Machine Learning

- Developed a multi-class classification model using Decision Trees on a structured dataset with 15 clinical features.
- Performed train-test split and hyperparameter tuning to optimize model performance.
- Evaluated model performance using Accuracy, Precision, Recall, and F1-score, achieving 95% test accuracy.

Technical Skills

Programming: Python, Java, C

Generative AI: Prompt Engineering, Zero-shot Prompting, Few-shot Prompting, Chain-of-Thought Prompting

LLM Concepts: Tokenization, Word Embeddings, Transformer Architecture, Attention Mechanism

Machine Learning: Scikit-learn, Decision Trees, Random Forest, Model Evaluation

Data Analysis: NumPy, Pandas, Matplotlib

Tools: Git, VS Code, LLM APIs (OpenAI, Gemini)

Research Interests

Generative AI, Prompt Engineering, Large Language Models (LLMs), Human-AI Interaction, AI-assisted Content Generation
